# 1.0 Introduction

XMEME, a revolutionary memecoin built on the XRPL (XRP Ledger), seeks to reshape the cryptocurrency landscape through its distinctive blend of humour, community engagement, and financial innovation. This whitepaper offers a comprehensive insight into XMEME's fundamental features, its role within the memecoin ecosystem, and the strategic vision propelling its development.

The conception of XMEME revolves around the belief that cryptocurrency should not solely revolve around financial gains but also contribute to the establishment of a robust and lively community. By harnessing the influence of memes, XMEME introduces humour into the realm of finance, establishing an interactive and inclusive environment for its users.

# 2.0 Tokenomics

● Founders   ● Ambassadors   ● Circulating

## 2.1 Circulating Supply: 85%

XMEME takes transparency to a new level, with 84% of the total supply already in circulation. This approach ensures a fair and decentralised distribution, fostering a healthy market dynamic.

## 2.2 CAG Allocation: 12%

The (CAG) allocation, constituting 12%, is reserved for the founder and the most dedicated XMEME member, Crypto Assets Guy. This strategic reserve demonstrates a long-term commitment to the project's success, aligning incentives for sustainable growth. At the time of writing approximately 18% of the wallet has been allocated to the newly formed XMEME reward programme.

## 2.3 Ambassadors/Influencers: 3%

XMEME allocated 3% of its supply for ambassadors and influencers, these funds were not held entirely at once but distributed on a set schedule, promoting responsible and gradual distribution. Following community requests all contracts have been suspended and 40% of the fund returned to the CAG allocation awaiting distribution.

## 2.4 Presale Burn: A Bold Move

XMEME initially offered 100 billion tokens at presale, showcasing confidence in its project. Post-presale and following the sale of just over 28.5 billion XMEME, the decision was made to burn the remaining 66% of the supply, underlining a commitment to scarcity and enhanced value for holders.

# 3.0 Unique Features

## **Meme Power:**

XMEME leverages the cultural phenomenon of memes to create a relatable and entertaining experience for users.

## **Community:**

This is everything to XMEME. More than a community, we are a family. At XMEME, we all support each other. It's all about proving a memecoin can succeed by having a healthy, positive, and united community. That's our special utility. We are the most loyal crypto community on the XRPL. XMEME is the memecoin the XRP community has always deserved.

## **Deflationary Supply:**

Buybacks and Burns occur each month through different methods such as the Magnetic DICE game, NFTs, and the most important one, the community burn wallet.

## **Transparency and Honesty:**

At XMEME, we make sure to be 100% honest and transparent. This movement was created because we were tired of bad actors in this space. We don't overcomplicate matters, and there are no false promises. Our statements aren't just empty words; they represent exactly what we're going to do. With Integrity and Unity we all succeed.

## **Innovation:**

We are constantly looking to bring new features to XMEME. Improvements and expansion can happen in a multitude of ways, and we are open to exploring them all, together.

## **Exchange Focus:**

XMEME currently trades solely via DEXs in a decision that encourages pure P2P (person-to-person) trading with real price discovery from supply and demand. While this decision has been made to ensure fairness and opportunity for the early stages of the token, we are always open to opportunities for future listings via either DEX or CEX should this be beneficial to XMEME. It's all about the community having the power and full control.

# 4.0 Community Engagement

## **Social Media:**

XMEME has an active presence on platforms like Twitter (X), Telegram, and YouTube to facilitate discussions and updates. Many of the largest XRPL influencers on Twitter are holders and actively work to spread the name of XMEME to the masses.

## **Contests and Giveaways:**

We hold periodic events and giveaways to reward the community and attract new members on social media.

## **Weekly Medium Articles:**

Each week we publish a new article regarding XMEME and its place within the cryptocurrency landscape.

# 5.0 Roadmap

## **Phase 1 (Completed):**

Token launch, initial community building, and strategic partnerships.

## **Phase 2 (Ongoing):**

Community Expansion, XMEME Reward Programme, Buybacks & Burns, XMEME NFTs and Marketing Campaign Expansion.

## **Phase 3 (Future):**

Partnership expansion, further NFT collections, and some surprise XMEME developments.

Our roadmap is intentionally designed to be simple, clean, and straightforward, reflecting our unwavering commitment to a clear and focused direction. This approach ensures that our goals are easily understandable and align with our vision, providing transparency and clarity for our community.

## 6.0 Security and Transparency

### **Blackholed:**

The issuing address has been blackholed, therefore preventing any further issuing of tokens.

### **Transparent Development:**

Open communication channels and regular updates on development progress.

## 7.0 Conclusion

XMEME, the #1 memecoin on the XRPL, transcends the conventional definition of a token. In essence, XMEME represents more than just a cryptocurrency – it embodies an innovative and collective approach that sets it apart from other tokens in the space. Coupled with its deflationary model, active community governance, and a steadfast commitment to its holders, XMEME is poised to make a lasting impact on the memecoin landscape.

XMEME is different!
